

MEETINGS PAST AND FUTURE

March 16th. After requests from members about the Stage 3 of our dowsing courses I, Alison, presented to the meeting '**An introduction to Radionics.**' While Dowsing is the detection of subtle energies, RADIONICS is the subtle manipulation of these energies. Based upon the technique of uplifting the energy of water, The main thrust of the address, was to establish how we determine these energies using a dowsing tool, and with RADIONICS how we can manipulate them without using a dowsing tool, but by the pure thought of "INTENTION'. From the positive feed-back I have received, we are definitely going to have to more in this area.

June 15th **Raymond Grace DVD. Raymon Grace's 'Water Clearing' DVD is a shining example of the very best use of dowsing and associated protocols. He starts with very clear instructions on how to clear negative spirits and entities as well as curses and negative thought forms. Raymon's technique for removing pollutants are probably the most successful in the world of dowsing, plus the fact that he covers all aspects of energising the water so it is the very best it can be. He finishes by thanking all the spirit helpers, without their help, this clearing would not happen**
